CUSTOMERS	SCORED	PREDICTED CHURN	CHURN RATE
10	10	3	30.0%

EXECUTIVE INTERPRETATION

3 of 10 scored customers are above the intervention threshold. Start with High-risk customers, then Medium-risk customers. 0 row(s) require correction.

The accompanying workbook is a copy of the uploaded data with Churn and Churn_Percentage added to each customer row.

Customer Findings and Actions

Row 2 | TEST-001 | High | 77.4% | Churn

Finding: New customer: prioritize an onboarding check-in; Month-to-month contract: easier to leave without renewal friction; Electronic check: a good candidate for an autopay incentive; Fiber customer: verify speed, reliability, and recent support experience

Recommended action: Retention action: contact within 48 hours. Start with: offer a one-year loyalty plan or contract incentive; then offer a small automatic-payment incentive; then test a free security and technical-support bundle.

Row 3 | TEST-002 | High | 77.9% | Churn

Finding: Month-to-month contract: easier to leave without renewal friction; Electronic check: a good candidate for an autopay incentive; Fiber customer: verify speed, reliability, and recent support experience; No security or tech support: consider a support bundle trial

Recommended action: Retention action: contact within 48 hours. Start with: offer a one-year loyalty plan or contract incentive; then offer a small automatic-payment incentive; then test a free security and technical-support bundle.

Row 4 | TEST-003 | Low | 11.8% | No Churn

Finding: The combined customer profile produced the current score

Recommended action: Keep in the standard nurture journey; no retention discount is needed now.

Row 5 | TEST-004 | Low | 15.2% | No Churn

Finding: Automatic payment reduces billing friction

Recommended action: Keep in the standard nurture journey; no retention discount is needed now.

Row 6 | TEST-005 | Low | 3.5% | No Churn

Finding: Automatic payment reduces billing friction

Recommended action: Keep in the standard nurture journey; no retention discount is needed now.

Row 7 | TEST-006 | Low | 6.9% | No Churn

Finding: Long tenure indicates an established customer relationship; Two-year contract provides strong retention stability; Automatic payment reduces billing friction

Recommended action: Keep in the standard nurture journey; no retention discount is needed now.

Row 8 | TEST-007 | Low | 1.6% | No Churn

Finding: Long tenure indicates an established customer relationship; Two-year contract provides strong retention stability; Automatic payment reduces billing friction

Recommended action: Keep in the standard nurture journey; no retention discount is needed now.

Row 9 | TEST-008 | Low | 1.6% | No Churn

Finding: The combined customer profile produced the current score

Recommended action: Keep in the standard nurture journey; no retention discount is needed now.

Row 10 | TEST-009 | Medium | 68.5% | Churn

Finding: New customer: prioritize an onboarding check-in; Month-to-month contract: easier to leave without renewal friction; Electronic check: a good candidate for an autopay incentive; No security or tech support: consider a support bundle trial

Recommended action: Retention action: add to the next campaign and contact within 7 days. Start with: offer a one-year loyalty plan or contract incentive; then offer a small automatic-payment incentive; then test a free security and technical-support bundle.

Row 11 | TEST-010 | Low | 5.6% | No Churn

Finding: Long tenure indicates an established customer relationship; Two-year contract provides strong retention stability; Automatic payment reduces billing friction

Recommended action: Keep in the standard nurture journey; no retention discount is needed now.

Method note: Findings use the saved Logistic Regression and CatBoost ensemble. Profile signals guide marketing outreach and are not proof of causation.
