

Customer Churn Assessment

Generated locally on 2026-08-22 01:30 UTC

CHURN PROBABILITY	RISK LEVEL	MODEL DECISION
85.0%	High	Churn

EXECUTIVE DECISION

Decision: TARGET FOR RETENTION. High churn risk at 85.0%, which is 54.0 percentage points above the 31% action threshold.

NEXT BEST ACTION

Retention action: contact within 48 hours. Start with: offer a one-year loyalty plan or contract incentive; then offer a small automatic-payment incentive; then test a free security and technical-support bundle.

MARKETING SIGNALS

- 1 New customer: prioritize an onboarding check-in
- 2 Month-to-month contract: easier to leave without renewal friction
- 3 Electronic check: a good candidate for an autopay incentive
- 4 Fiber customer: verify speed, reliability, and recent support experience
